Mutib bin Abdulaziz Al Saud **Architect of Vision. Champion of Benevolence.** **1931-2019**

spent his life in strategic planning and decision-making, moving between government and ministerial roles, witnessing and participating in building development paths and dealing with its many challenges — By his management, may God have mercy on him, he was perceptive, anticipating events, seeing beyond the moment, and weighing matters with wisdom and deliberation.

The Mutib Foundation can be considered an extension of this approach; following in his footsteps, with careful planning, boldness of initiative, and the generosity and benevolence of his spirit.

Chairman of the board of trustees

Saud bin Mansour bin
Mutib bin Abdulaziz
Al Saud

We praise Allah for granting us success and enabling us to continue the blessed journey whose foundations were laid by His Royal Highness Prince Mutib bin Abdulaziz Al Saud, may God have mercy on him. We ask Allah Almighty to accept his work and to place this renewed giving in the balance of his good deeds.

We also hope to honor his legacy through our deep belief that responsible giving is a fundamental pillar for building a prosperous society, and that charitable work is not merely a passing act of kindness, but rather an ongoing science based on solid foundations of planning, development, and sustainability. This is what we call The science of benevolence.

At Mutib bin Abdulaziz Charitable Foundation, we aspire to build a pioneering model in the field of charity work that elevates giving practices to

become more impactful and effective, and aligns with Vision 2030 goals, which has made the nonprofit sector a primary driver of development. From this standpoint, we do not limit ourselves to contributing; rather, we aspire to lead transformation of this sector through institutional excellence, effective governance, and optimal investment of resources, to make our giving even more sustainable and our impact even deeper.

The science of benevolence is a working methodology that combines giving according to a solid system of methodologies that seek to achieve impact, principles, values, and best practices.

This enables us to achieve an impact worthy of the great trust placed in us, and reflects our loyalty to the spirit of our generous patron.

Board of Trustees

Sets the institution's strategic direction, oversees governance, and promotes efficiency and transparency to ensure the achievement of objectives and meaningful impact.

Executive Summary

Grant Areas 2024

Executive Summary

Executive Summary

In 2024, the Mutib Foundation maintained its steadfast commitment to supporting development projects that address essential needs. Our initiatives were guided by rigorous planning and strategic partnerships, all rooted in the Science of Benevolence philosophy.

Key focus areas included:

- Charity and Public Benefit
- Water Provision (Siqaya)
- Mosque Development
- Support for the Needy
- Will Initiatives

These initiatives were carefully selected based on identified needs, with a strong emphasis on sustainability and maximizing donor impact. Our 2024 grants reflected a clear trend toward deepening institutional impact and applying robust operational policies.

Our activities this year reaffirmed the Foundation's position as a leader in institutional development and social impact, setting the stage for continued progress toward Vision 2030.

Our review of the grant areas is organized around six key pillars, each reflecting the Foundation's institutional priorities and strategic vision, as detailed below:

Another Stage on Our Road to 2030

Aligned with Vision 2030, the Kingdom of Saudi Arabia has entered a new era of revitalizing and empowering the nonprofit sector, establishing clear objectives to foster a resilient and adaptable society. The Mutib Charitable Foundation has actively embraced this mandate, guided by a forward-looking vision and a philanthropic philosophy that informs every aspect of its operations and governance.

The Foundation recognizes its responsibility to lead the sector by championing best practices in institutional transformation, supporting high-impact projects and programs, and ensuring the seamless execution of strategic initiatives. Our aim is to drive broad-based development, promote innovative and sustainable solutions, and secure long-term financial resilience.

As we reaffirm our original pledge, we remain committed to dynamic community engagement, pioneering initiatives, and the continuous exchange of knowledge and ideas through strategic partnerships—opening new horizons for the sector’s evolution and modernity.

Charity and Public Benefit

Sponsored Endowments

The Foundation has strategically prioritized endowment support, recognizing its pivotal role in amplifying impact and advancing the financial autonomy of nonprofit organizations. 60% of the Foundation's public benefit allocations have been committed to this endeavor, underscoring a steadfast belief in empowering partners through renewable, sustainable resources that fortify their missions with resilience and a long-term horizon.

By their very design, endowments enable organizations to expand institutional capacity, engage in confident, forward-looking planning, and establish a durable presence within their communities. Through this model, the Foundation actively cultivates a sophisticated and integrated philanthropic landscape—one that harmonizes direct action with catalytic tools to secure enduring benefits and far-reaching impact.

7. Wifaq Family Association Endowment.
8. Rafid Association Endowment Project.
9. Non-Profit Sector Forum- Medina.
10. Al-Barak Da'wah Association Endowment.
11. Makkah Center for Global Guidance Endowment.
12. Al-Ajyal's Care Association Endowment.
13. Project to Support the Al-Badayi' Memorization Association Endowment.
14. Al-Dilam Memorization Association Endowment.

Charity and Public Benefit

Empowering Nonprofit Sector

In 2024, development was a key focus in empowering the Nonprofit sector, accounting for the largest share of projects compared to establishment and support-focused initiatives, due to its vital and crucial role in enhancing productivity and strengthening institutional effectiveness.

Supporting Nonprofit Sector by Projects Type

Development includes two integrated tracks:
Qualification, which focuses on building basic skills and knowledge, and
Competencies placement, which enhances the readiness of individuals and institutions to implement these skills effectively, contributing to raising the efficiency of Nonprofit sector and sustaining its impact.

Charity and Public Benefit

Support that Enhances Impact

إحسان
منصة وطنية للعمل الخيري

As an extension of The Foundation's efforts to empower the Nonprofit sector and enhance its impact, the Mutib bin Abdulaziz Charitable Foundation has provided support of

7,000,000

to the Ihsan Platform as part of the fourth edition of the National Campaign for Charitable Work, launched with the Custodian of the Two Holy Mosques' approval. This support affirms The Foundation's commitment to enabling non-profit organizations to efficiently deliver donations to those who deserve them, and to promoting social solidarity and organized charitable work.

Charity and Public Benefit

Quranic Projects

Quranic Projects is one of the most vibrant areas of grantmaking, with its cognitive model and strategic depth within its projects, many of which are characterized by integration and excellence, whether in terms of their direct value, the achievement of their objectives, or the impact they have on their target groups. This strategic approach considers the diversity of application and implementation across sites and educational target groups, comprehensive coverage in terms of focus and impact, and with a range of translation languages, comprehension aids and digital apps

Most Important Quranic Projects:

	Supporting Projects	Project Implement Agency	Distribution of Qurans	“Muddakir” Tafsir in Malay	Meanings of Quran’s translation into Portuguese	
						
	Media/Digital Systems	Project Implement Agency	Quranic Applications Hackathon	Digital System for Quranic Guidance	“Wahy” Podcast	Replacing and Improving External Recording Devices
						

Charity and Public Benefit

Quranic Projects

Quran Memorization Circles' Endowments

Enhanced Cognitive Model projects—especially those centered on Quranic education—require a deliberate progression of qualifications and a structured approach to cultivating the skills and knowledge of target audiences. Successful implementation hinges on a deep understanding of both sector-wide challenges and the evolving needs of beneficiary groups, identifying the critical nexus where alignment can drive optimal learning outcomes. This approach emphasizes practical, measurable, and experiential methods for capability development, moving beyond theoretical frameworks. The tangible impact of this methodology is evident in the sustained growth and excellence of Quran memorization circles supported by the Foundation throughout the Kingdom.

2. Geographical Breakdown

According to the ratios, concentration of approved projects is evident in the five largest regions in terms of population density, while maintaining a comprehensive distribution across the Kingdom's various regions.

The highest percentage of projects in major regions (particularly Riyadh and Makkah Al- Mukarramah) were linked to initiatives with a broad strategic nature, launched from these two regions and targeting high-impact areas. Their impact extended to more than a third of the world's countries, leveraging the interactive technical system as a tool for expansion and dissemination.

In contrast, the percentage of projects implemented in more than one region of the Kingdom exceeded 23%, demonstrating the breadth of areas benefiting from the projects business model. Some of these projects spread across more than one region of the Kingdom, a clear indicator of the development of project feasibility.

Priority projects in the areas of debts, emancipations, and the needy also accounted for more than a third of the Foundation's grants, a strategic direction that consistently strengthens the balance between the focus and impact areas.

Geographical Breakdown

Distribution of Institutional Development Projects

Region	Implemented Projects	Details of Approved Projects
Makkah	33	33 Project are located within the Holy Capital in foundational medical and therapeutic projects' field, while remaining percentages are distributed to support non-profit sector in particular.
Riyadh	30	The Foundation's projects are concentrated in Riyadh, the capital, representing 69% of Quranic projects sector. 56% of these projects serve as global Quranic applications for hundreds of thousands of people worldwide every day.
Asir	9	The Asir region is witnessing a focus on endowment projects, with priorities shifting according to region's needs.
Eastern Province	8	The Foundation's projects in Eastern Province are distributed across eight projects, reflecting a geographical distribution that enhances the scope of the projects' impact across the Kingdom.
Qassim	7	The Foundation's projects in Qassim region are distributed across six projects, reflecting a geographical distribution that enhances the scope of the projects' impact across the Kingdom.
Madinah	4	Approximately 4% of projects are concentrated in Madinah city (the lowest concentration among major cities). The majority of the region's activity is focused on water projects.
Jazan	3	Jazan is witnessing a focus on projects for the needy, with priorities shifting according to region's needs.

Geographical Breakdown

Distribution of Institutional Development Projects

Region	Implemented Projects	Details of Approved Projects
Hail	3	Hail's projects focus on supporting endowments, supporting workers in the non-profit sector, and maintaining mosques.
Northern Borders	1	The Northern Border Project was directed towards debt repayment and blood money.
Projects covering more than one region	31	The projects which span multiple regions, cover a wide range of areas, including empowering the non-profit sector, seasonal projects such as Ramadan and Hajj giving, mosque maintenance and development, and providing assistance to families and those in need.

3. Water Projects

3

Water Projects

From Watering to Rehydration (Irwaa)

Water provision projects for pilgrims and Umrah performers remain among the Mutib Foundation's most cherished and enduring grant areas—reflecting the vision and compassion of its late founder, may God have mercy on him. In response to record-breaking temperatures last season and anticipated rises during upcoming Hajj periods (May and June), the Foundation adopted a proactive, strategic focus beginning with the 1445 AH Hajj season. The Hajj watering program was reimagined with targeted impact across three integrated sectors, ensuring pilgrims receive a consistent supply of cold water. By God's grace, this protects them from dehydration and hypoperfusion—critical conditions that can lead to heat stress, sunstroke, orthostatic hypotension, dizziness, and fainting.

More than a logistical effort, the program has embraced Irwaa (quenching) as a health-driven and preventative imperative. Maintaining adequate hydration is no longer viewed as a supportive service but as an essential safeguard for preserving the energy, mental clarity, and physical well-being of pilgrims—allowing them to fulfill their rites safely and with dignity.

Prevents dehydration /

Water Projects

Developing Pilgrims' Watering System in Holy Sites:

As a proactive initiative, we worked with our strategic partner, Kidana Company, to study development needs of the pilgrims' water supply system in the holy sites, adding 355 large water coolers and 2,130 water taps. significantly enhancing capacity and resilience.

These enhancements are synchronized with upcoming Hajj pilgrimage plans and the projected growth in pilgrim numbers. Beyond infrastructure, this initiative reflects the Foundation's broader commitment to embedding strategic partnerships within all development planning and innovation efforts—ensuring sustainable, scalable impact.

Number of refrigerators	678	211	31.1%	6 months	13,950,000 SAR
Number of taps	4068	1266			

4. Mosque Development

Mosque Development

The Mutib Charitable Foundation oversees twenty-two mosques, each with an average age of 27 years. The Foundation's management strategy embodies a comprehensive vision that redefines mosque development across both architectural and educational dimensions. This vision not only enhances structural design but also revitalizes the mosques' spiritual, educational, and community roles, ensuring alignment with the evolving needs of worshippers and the mosque's expanding role within its surrounding community.

Architectural upgrades were driven by a modern understanding of the mosque's multifaceted purpose. Facilities were thoughtfully reconfigured to accommodate diverse functions, including expanded prayer spaces, residential quarters, administrative areas, women's prayer halls, and funeral preparation rooms. These improvements were executed through integrated engineering solutions designed to enhance operational efficiency, increase readiness, and create a safe, welcoming environment for worshippers and visitors alike.

The Foundation's operational approach is rooted in data-driven analysis, leveraging real-time maintenance data and recurring fault patterns. This enabled the transition to a proactive preventive maintenance model, which studies show can extend facility lifespan by 20% to 40% and reduce emergency maintenance costs by up to 30%, adhering to global best practices.

At the same time, the mosques' internal spaces were reimagined as centers of education and knowledge-sharing through strategic partnerships. This transformation reinforces the mosque's role as a beacon of learning and community engagement—where tradition, identity, and measurable social impact converge.

5. **Institutional** **Performance**

Institutional Performance

Knowledge Transfer

The Foundation has prioritized the adoption of sustainable institutional excellence policies, adopting modern administrative concepts and systems as critical tools in implementing a strategic plan for any project. This creates a positive public image and a prestigious position for charitable work in the media and across both internal and external communication levels. This approach also has a positive impact on work productivity, improving the services provided, and enhancing responsibilities, tasks, and organizational procedures, in line with the objectives and institutional identity of the Mutib Foundation.
